Rich, sorry for the delay in responding to you. I intended to write to Vicky and Karen and propose a meeting/discussion at some point but haven't gotten to that yet. Anyway, just reread your note and released you may have been asking about whether we should let these comments delay our preparation of week 2 packages. The answer is NO! Thanks, den.

Den,

We can address the formatting issues raised below in the week 2 data roll out. This includes additional footnotes on lead, copper and other clarifications on data rejected, etc.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

I raise this to you, since we are working toward finalizing the week 2 packages.

BTW, we will be able to address all of HQ Virtual EU comments in week 2.

Rich

Ex. 5 - Deliberative

Hope this helps, I got pulled into a bunch of meetings today so most of these are the 3 minute review of what was found. Sorry!!!

Subject: Review of DRAFT Week #2 - Residential Data Reports

Vicki and Karen -

I have attached the PDFs of the 20 locations sampled during week #2 (1/30/12 - 2/3/12). Please note that while the data is considered final, we are still finalizing the summary report. I would very much appreciate your help in conducting a final QA/QC of each of these packages prior to release.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

It sounds like you may be reviewing the original data packages for week #1. Please note that the following changes were made to the residential data summary reports since the original week #1 reports were released:

- removed the Sample Date column to make room for wider columns (sample date now noted in the title)
- created wider columns to prevent information in the database from being cut off
- moved some MCL reference values showing up in the Trigger Level column to the appropriate MCL reference columns
- included some missing MCL reference values (not noted previously due to the different naming conventions for various analyses)
- included missing "J" values (noted as lab qualifiers in the database,

but not included in the residential data summary)

Some of the issues you noted in previous e-mail should have been addressed since the original week #1 data packages were released. However, as you noted, it looks like we may still be missing MCLs.

For example Vicki noted : Dichloroethene-1,2 trans is same as Dichloroethylene (trans-1,2)? (CASRN 156-60-5) - if yes, there is an MCL of 100 ug/L not listed in chart (OK, DL is 0.50 ug/L; no trigger level in chart)

In addition, certain analytes (lead, copper, etc) do not have MCLs - but action levels.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

In addition to the reports,

I have also included a spreadsheet listing the trigger levels established, to date. A key to the data report is also included.

I know there is much to review, but are hoping to have any of your comments by COB tomorrow. Please feel free to contact me with any questions and/or if you need additional info.

THANKS!!!
